

Belmacil has always strived to be a superior brand of eyelash tint and now with the new packaging and colours available, Belmacil continues to be the number one choice for caring beauty professionals who seek the perfect colour for their clientele. “

Now with eleven rich, luxurious colours in the range to choose from – Black, Blue Black, Dark Brown, Light Brown, Honey Brown, Graphite, Blue, Violet, Blonde and two **NEW exciting colours – “Red and Green”**.

Red is great for your clients that have Auburn, Burgundy or any other shades of red. You can tint the eyebrows with Belmacil Red to achieve the perfect look for your client. You can also mix with a little brown if desired to bring out your clients individual style.

Green is an exciting new colour that we have had many requests for. This colour looks great on lighter coloured hair, and people with blue, green or brown eyes. You can always mix in a little Belmacil black to add more definition with a green shimmer for your clients with darker hair.

You may notice that there are some changes to the way Belmacil looks when it is mixed and processed. This is because European legislation now states that hair dyes and eyelash tints must change some key ingredients to make them less evasive and safer to use. You will still achieve the same excellent results that Belmacil has always delivered and you have come to expect from the world's number one eyelash tint.

Belmacil is a superior tint for professional use only, its unique Swiss formula gives you more colour depth and longer lasting results and what's more with our new larger tubes, Belmacil is more profitable than ever, with an incredible 180 applications per tube.
